

# **Sprint Review**

## **Main problems Encountered**

- 1. Lack of planning, issue board not yet established**
- 2. Did check style during meeting, which took up large parts of it. Left little time for planning etc.**
- 3. Even work distribution**

**Adjustments from previous sprints - none, this was the first.**

## **Adjustments for next sprint**

- Checkstyle
- Improved code modularity
- Follow the issue board more rigorously
- Approvals for merge request (at least two)
- Merge code review
- Assign even workload
