Sprint Review

Main problems Encountered

1. **Lack of planning, issue board not yet established**
2. **Did check style during meeting, which took up large parts of it. Left little time for planning etc.**
3. **Even work distribution**

Adjustments from previous sprints - none, this was the first.

Adjustments for next sprint

- Checkstyle
- Improved code modularity
- Follow the issue board more rigorously
- Approvals for merge request (at least two)
- Merge code review
- Assign even workload
