Meeting 3

Quoted text will give you extra pointers to how an agenda should look like

Opening

Check that everyone is present. (Including TA).

Approval of the agenda

Check if everything that should be discussed in this meeting is in the agenda.

Points of action

- Friend system - simply add, request or otherwise
- API - which to choose
- Username or just login by email?
- Testing GUI - necessary?
- Uploading check style screenshot.

Someone add these points of action to the issue board.

Any other business

If anybody has something that should be discussed but came up with that after the agenda was finalized (in point 2), he/she should bring that up now so that it can be discussed after all.

Question round

If there are any questions, now is the time to ask them.
